How do Cartographer Conventions Work?

After all convention servers are finished processing a

Cartographer Conventions is finished with its work and

The .spec.template's PodTemplateSpec is enriched by the conventions and exposed as the .status.templates

PodTemplateSpec. A log of which sources and

conventions are applied is captured with the

PodIntent for a workload, the convention controller updates the PodIntent with the latest version of the

PodTemplateSpec and sets PodIntent.status.conditions[].status=True where PodIntent.status.conditions[].type=Ready. This status change signals the Supply Chain Choreographer that

can move on to the next step.

on the PodTemplateSpec.
